DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel M. Fogelson (Reg. No. 43,613) on 07/26/10.

Please amend claims (**refer to amendments filed 05/22/08**) as follows:

In claim 1, line 3, delete "...capable of..." and insert "...for..." after module;

In claim 1, line 6, delete "...adapted to..." and insert "...to..." after module;

In claim 1, line 8, delete "...capable of..." and insert "...for..." after area;

In claim 1, line 18, delete "...a second..." and insert "...said second..." after use;

In claim 17, line 4, delete "...adapted to..." and insert "...to..." after module;

In claim 17, line 16, insert "," after "stored";

In claim 17, line 17, insert "," after "stored" and delete "...starts..." after "...corresponds...";

Allowable Subject Matter

2. Claims 1-17 and 19-22 allowed.

3. The following is an examiner's statement of reasons for allowance: With respect to independent claims 1 and 17, the instant invention is directed to a system for automatically switching to an interactive application during a commercial break in video programming and a method of executing an interactive application during a commercial break. The relevant prior art of record, such as **Tsuchida et al (2002/0194593)** disclose method of substituting content during program breaks, detecting a break in a broadcast program, and in response to the break, showing substitute content. **Karltun et al (5,835,717)** disclose system and method for saving state information in an interactive TV system. **Estipona (7,263,711)** discloses terminating enhanced TV broadcasts. **Beard (6,172,712)** discloses TV with hard disk drive for later playback where the stored video data is capable of being playback back at a rate slower, faster or the same as the original video signal. **Ellis et al (2003/0149988)** disclose client server based interactive TV program guide system with remote server recording. However, neither **Tsuchida, Karltun, Estipona, Beard nor Ellis** and any of the cited references teach or suggest, alone or in combination the feature of "...playing back said stored information in the primary area, when said interactive application is terminated, as to drop at least one frame of video from said information until said video program can be presented in real time." as recited in combination with other features of independent claims 1 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tomsen (2002/0013950) discloses method and system to save content for deferred transaction via interactive TV.

Megeid (6,636,271) discloses apparatus and method for playing back a recorded video signal in time compressed manner.

Goldberg et al (5,692,213) disclose method for controlling real-time presentation of A/V data pm a computer system.
